

Getting Started

Hello user this is team dCovid19. we hope in these few minutes we will be able to clear all your doubts regarding this app. We will start with registering your account in our server to help a person in need.

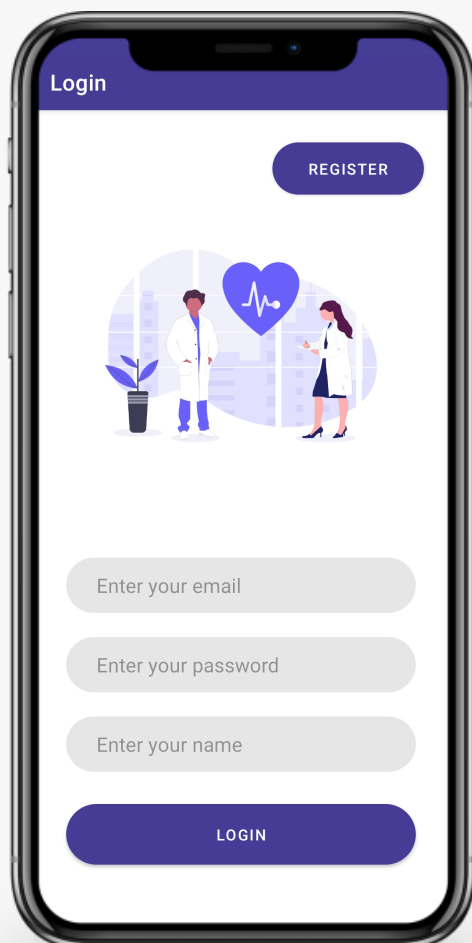

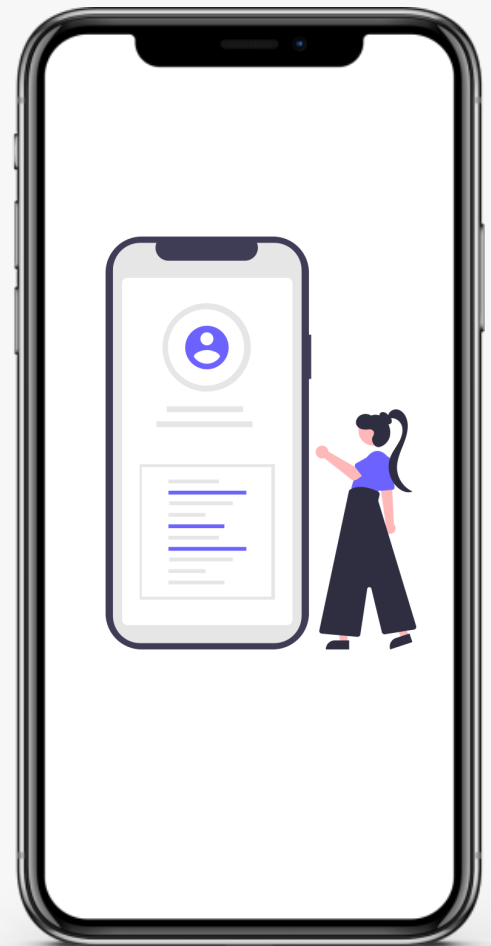

About The App

Powered by an army of selfless volunteers, working 24x7 to help you find verified resources related to all COVID needs. If you've developed a similar platform, let's join hands to create a common database, enabling

From Developer

We're a team of strangers. A common mission to help India during the Covid crisis, brought us all together to create this platform. We need your support. If you've any verified information, we sincerely request you to add it. Don't worry! We'll verify it before publishing. If you want to help us in verifying and updating all the information, please become a volunteer. We need you. India needs you!

Login

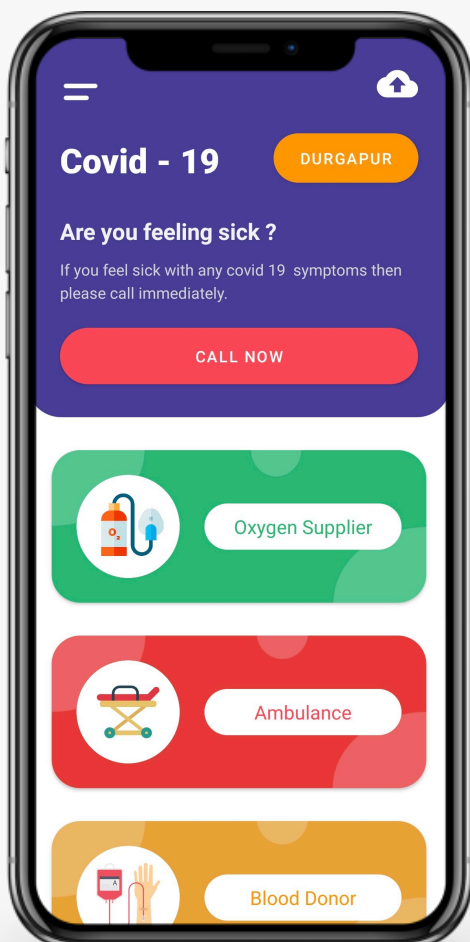

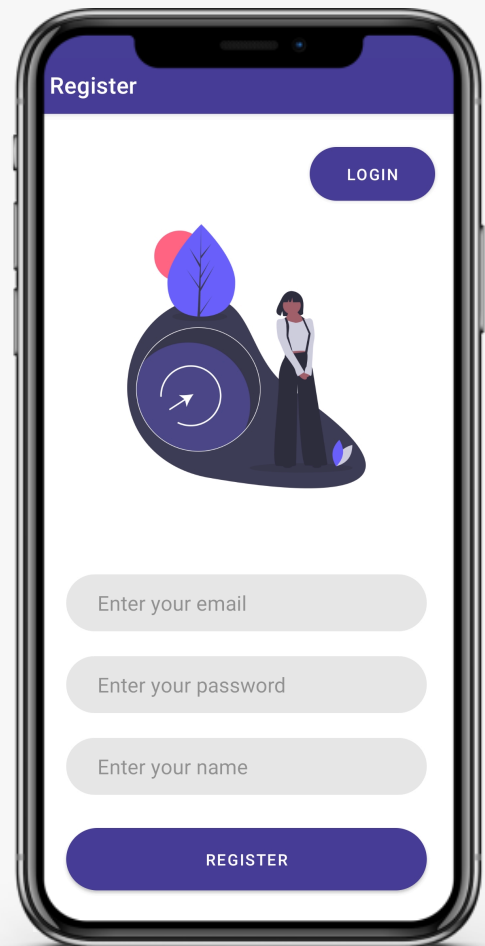

The login screen mainly consists of 3 text input fields. The user needs to provide his registered email and password in order to use the app. The user also needs to enter his name in order to proceed. The device must have an active internet connection in order to verify the details.

If the user is new to this platform, then he/she needs to register himself/herself by clicking the register button.

Register

The register screen mainly consists of 3 text input fields. The user needs to provide his email and password in order to use the app. The user also needs to enter his name in order to proceed. The device must have an active internet connection in order to create an account in our servers.

After the registration is successful the user will be redirected to the home screen.

Home

The home screen consists of various buttons and layouts, in order to perform various actions inside the app. Let's understand all of them sequentially.

Account

On pressing the account button the user will be directed to his account page, from where he/she can change the password for his/her registered account or logout from the app. The user can also contact the developers team to report any bug, or if he/she faces any issue while surfing through the app.

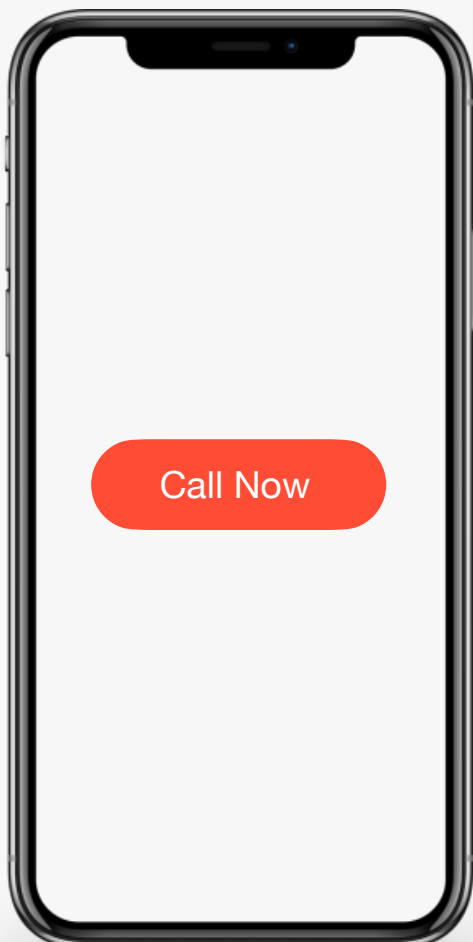

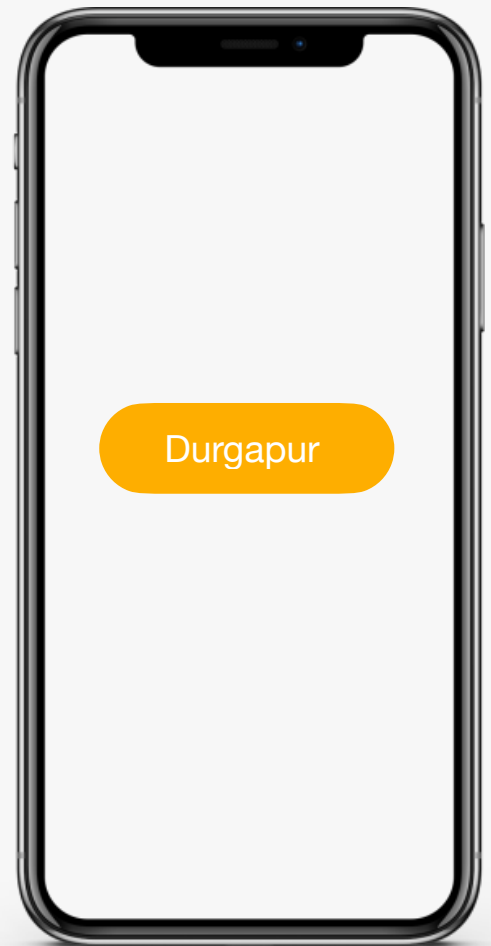

Upload

The upload button enables the user to upload more available resources verified by himself which may be helpful to other patients also. The upload resource page consists of a few text input fields which the user needs to fill up accordingly and submit to our servers. The admin team will re-verify the submitted detail and then publish it to the designated resource page.

Location

The location button displays the user available cities and the user can choose the most suitable one. Currently we support medical resources from durgapur only. With future updates we will increase our city selection with more number of volunteers to verify the uploaded details.

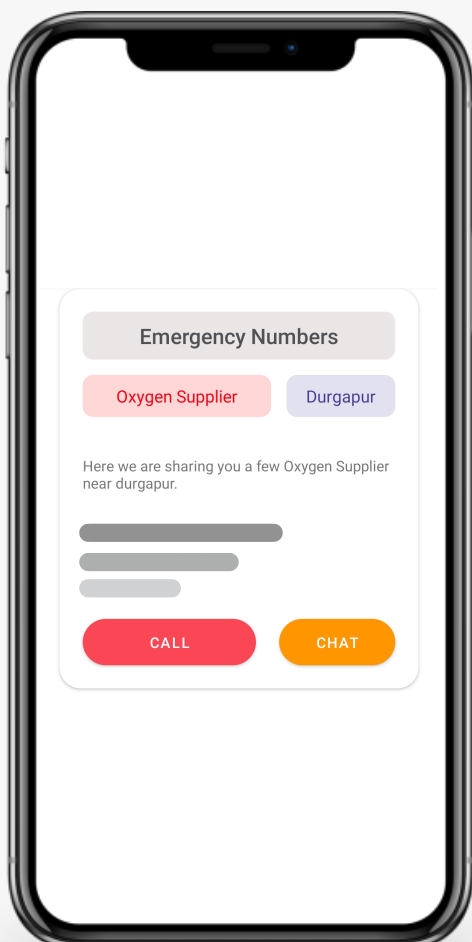

Call Now

The call now button is an emergency button which connects the user directly with the National Covid Helpline number of India. The patient can get appropriate recommendation from the experts on the other side.

Resources

The app comes with a wide range of resource selector. Be it an oxygen supplier or an ambulance service. The user can choose the appropriate card for the needed resource and see all at the available options in the resource page.

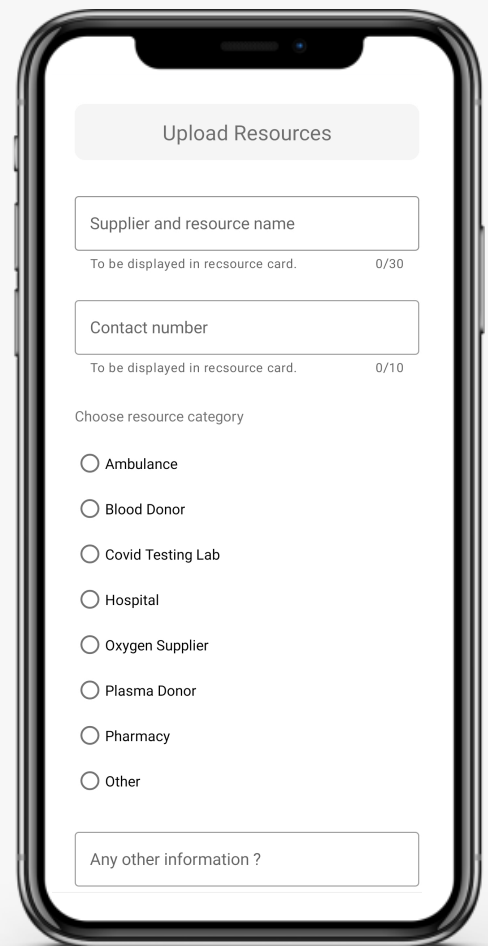

Preview

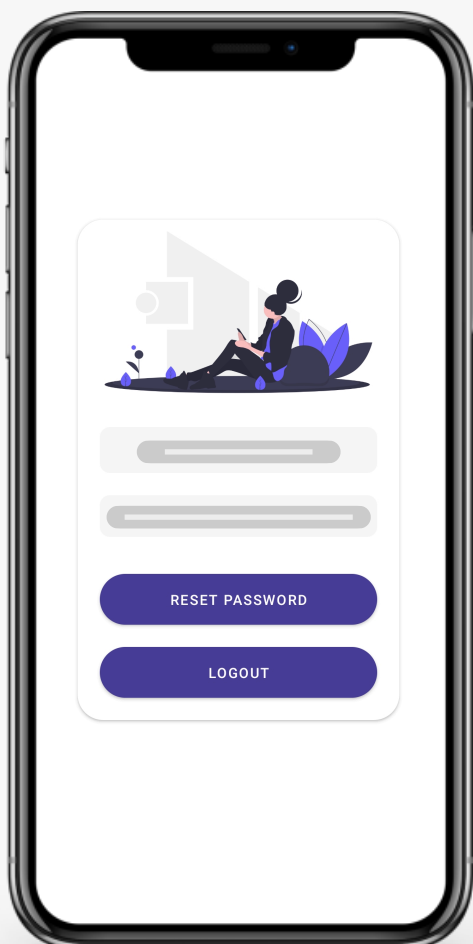

After the user select the necessary resource, he/she will be redirected to the resource page. Here the user is allowed to choose any of the resource provider. The user can select the call/chat option from any of the resource card to contact the supplier.

Upload Resource

The app comes with a wide range of resource selector. Be it an oxygen supplier or an ambulance service. The user can choose the appropriate card for the needed resource and see all at the available options in the resource page. If you have any leads to the valuable resources, then please upload it. We need you! India needs you.

The smartphone screen shows the 'Upload Resources' form. At the top is a header 'Upload Resources'. Below it are two input fields: 'Supplier and resource name' with a character count 'To be displayed in resource card. 0/30', and 'Contact number' with a character count 'To be displayed in resource card. 0/10'. Below these is a section 'Choose resource category' with a list of radio button options: Ambulance, Blood Donor, Covid Testing Lab, Hospital, Oxygen Supplier, Plasma Donor, Pharmacy, and Other. At the bottom is an input field for 'Any other information ?'.

Account Page

The account page enables the user to modify his/her existing account. He/she can reset password or logout from the app. The user can also contact the team for any data related queries.

Thank You

You have successfully completed this journey.
